SUMIT MAZUMDAR is a trained demographer, with a major in Economics. He currently works as a Fellow at the Institute for Human Development (IHD), New Delhi where he coordinates the Population Health Nutrition (PHN – RP) Research Programme. He primarily works on issues related to economics of health and health care, particularly on social health determinants for chronic diseases, and health service delivery models. His research interests

span empirical issues in development economics related to shocks and welfare outcomes, and impact evaluations of development interventions. Under the PHN-RP, Sumit is involved in conceptualizing, designing and execution of research studies concerning the broad themes of health systems strengthening, child under nutrition and health & nutrition service delivery models. He has worked in field-level studies in West Bengal, Bihar, Maharashtra, Gujarat and Himachal Pradesh, and has instructed training programmes on quantitative techniques of research and data analysis.

CAMILLE SAINT-MACARY is a research fellow at the French Institute of Research for Development (IRD) since 2012, currently at DIAL, an IRD - University Paris-Dauphine research centre in Paris. Her research focuses on impact evaluations and the microeconomic analysis of rural institutions in developing countries. She holds a PhD in Agricultural Economics from the University of Hohenheim, Germany, and a Master degree from CERDI (Centre of Study and Research on International Development), Université d'Auvergne, France.

Email: saint-macary@dial.prd.fr

V. SUJATHA is Professor at the Centre for the Study of Social Systems, School of Social Sciences, Jawaharlal Nehru University, New Delhi. She specializes in sociology of knowledge and sociology of health and medicine. Among other writings, her book, *Health by the People: Sociology of Medical Lore* (2003), focuses on the relation between medical knowledge of the ordinary people and that of the expert physicians of traditional medicine in south India. The edited volume, *Medical Pluralism in Contemporary India* (2012), (co-editor Leena Abraham) presents essays that examine the enduring presence of medical systems like ayurveda, siddha, unani and other local health traditions in contemporary India, with a detailed introduction on their entry into the institutions of nation state and the market since the 20th Century. Her monograph, *Sociology of health and medicine New Perspectives* (2014) brings medical pluralism into the heart of the social theory of health and medicine, that hitherto has been labouring under the assumption of medicine in the singular, namely, western bio medicine. Sujatha has completed a UGC-DAAD research project on ayurvedic institutions and practices in Europe. She is currently the Co-ordinator of the Global Studies Programme at JNU, an intercultural postgraduate programme involving participating institutions from 5 continents that has seen students from 60 different countries of the world in the past decade.

OLIVIER TELLE is a research fellow at the Laboratory for Genetics of Human Response to Infection, Institut Pasteur (Paris). He holds a MA and a PhD in geography (University of Rouen) followed by a post-doctoral stay at Institut Pasteur (3 years, 2001-2014). He has been working on the diffusion of dengue in Delhi since 2007. His work examines disparities in the spatial epidemiology of the disease in the Indian capital and other metropolitan areas. It focuses on urban dynamics, taking the disease as a revealer of environmental disparities but also as an indicator of the social and economic evolutions of a territory. Ultimately this work aims to show how the combination of actors and phenomena are responsible for the emergence and perpetuation of the disease in urban settings.
